

## All Covered Backup for Servers

Backup, disaster recovery and business continuity solutions were once something that only the largest enterprise computer users could afford. All Covered's Backup for Servers solutions change that. Our local and cloud backup and continuity solutions help you get your data back up and running or keep it up and running in the event of data loss events, accidental deletion, server malfunction, local emergency or regional natural disaster. With All Covered's solutions, your business systems are easily available to keep your business running.
